## DELIVERING RENEWABLE ENERGY IN THE SOUTH EAST TV ENERGY EIGHT POINT ACTION PLAN FOR 2004

We believe that if we are to make serious progress against targets for 2004 then we need to address a number of matters with urgency. TV Energy will focus its efforts on an 8 point action plan for 2004.

- **ACTION ONE:** We will provide more targeted education of key decision makers (Councillors, Planners ...) through site visits, seminars, SPG production, resource studies catalysing the development of local environmental champions who understand the wider energy context
- **ACTION TWO:** We will seek more accountability at the point that decisions are made (planning meetings) and champion local targets (for new generation – ring-fence existing generation) within a sub-regional context
- **ACTION THREE:** We will apply zero tolerance to renewable energy ‘tokenism’ and ‘humbug’
- **ACTION FOUR:** We will make more up-to-date information more readily available to stakeholders
- **ACTION FIVE:** We will place even more emphasis on getting key target flagship projects in place and build ‘observer’ or ‘replicator’ networks around them
- **ACTION SIX:** We will help create an ESCo (Energy Services Company) ‘RENAISSANCE ENERGY’ with local partners to deliver local renewable energy in the south east available to all
- **ACTION SEVEN:** We will continue to build the local wood fuel supply infrastructure through TV Bioenergy and invest in coppice
- **ACTION EIGHT:** We will establish TV Energy Trust to channel funds to local community projects

**Keith Richards**
